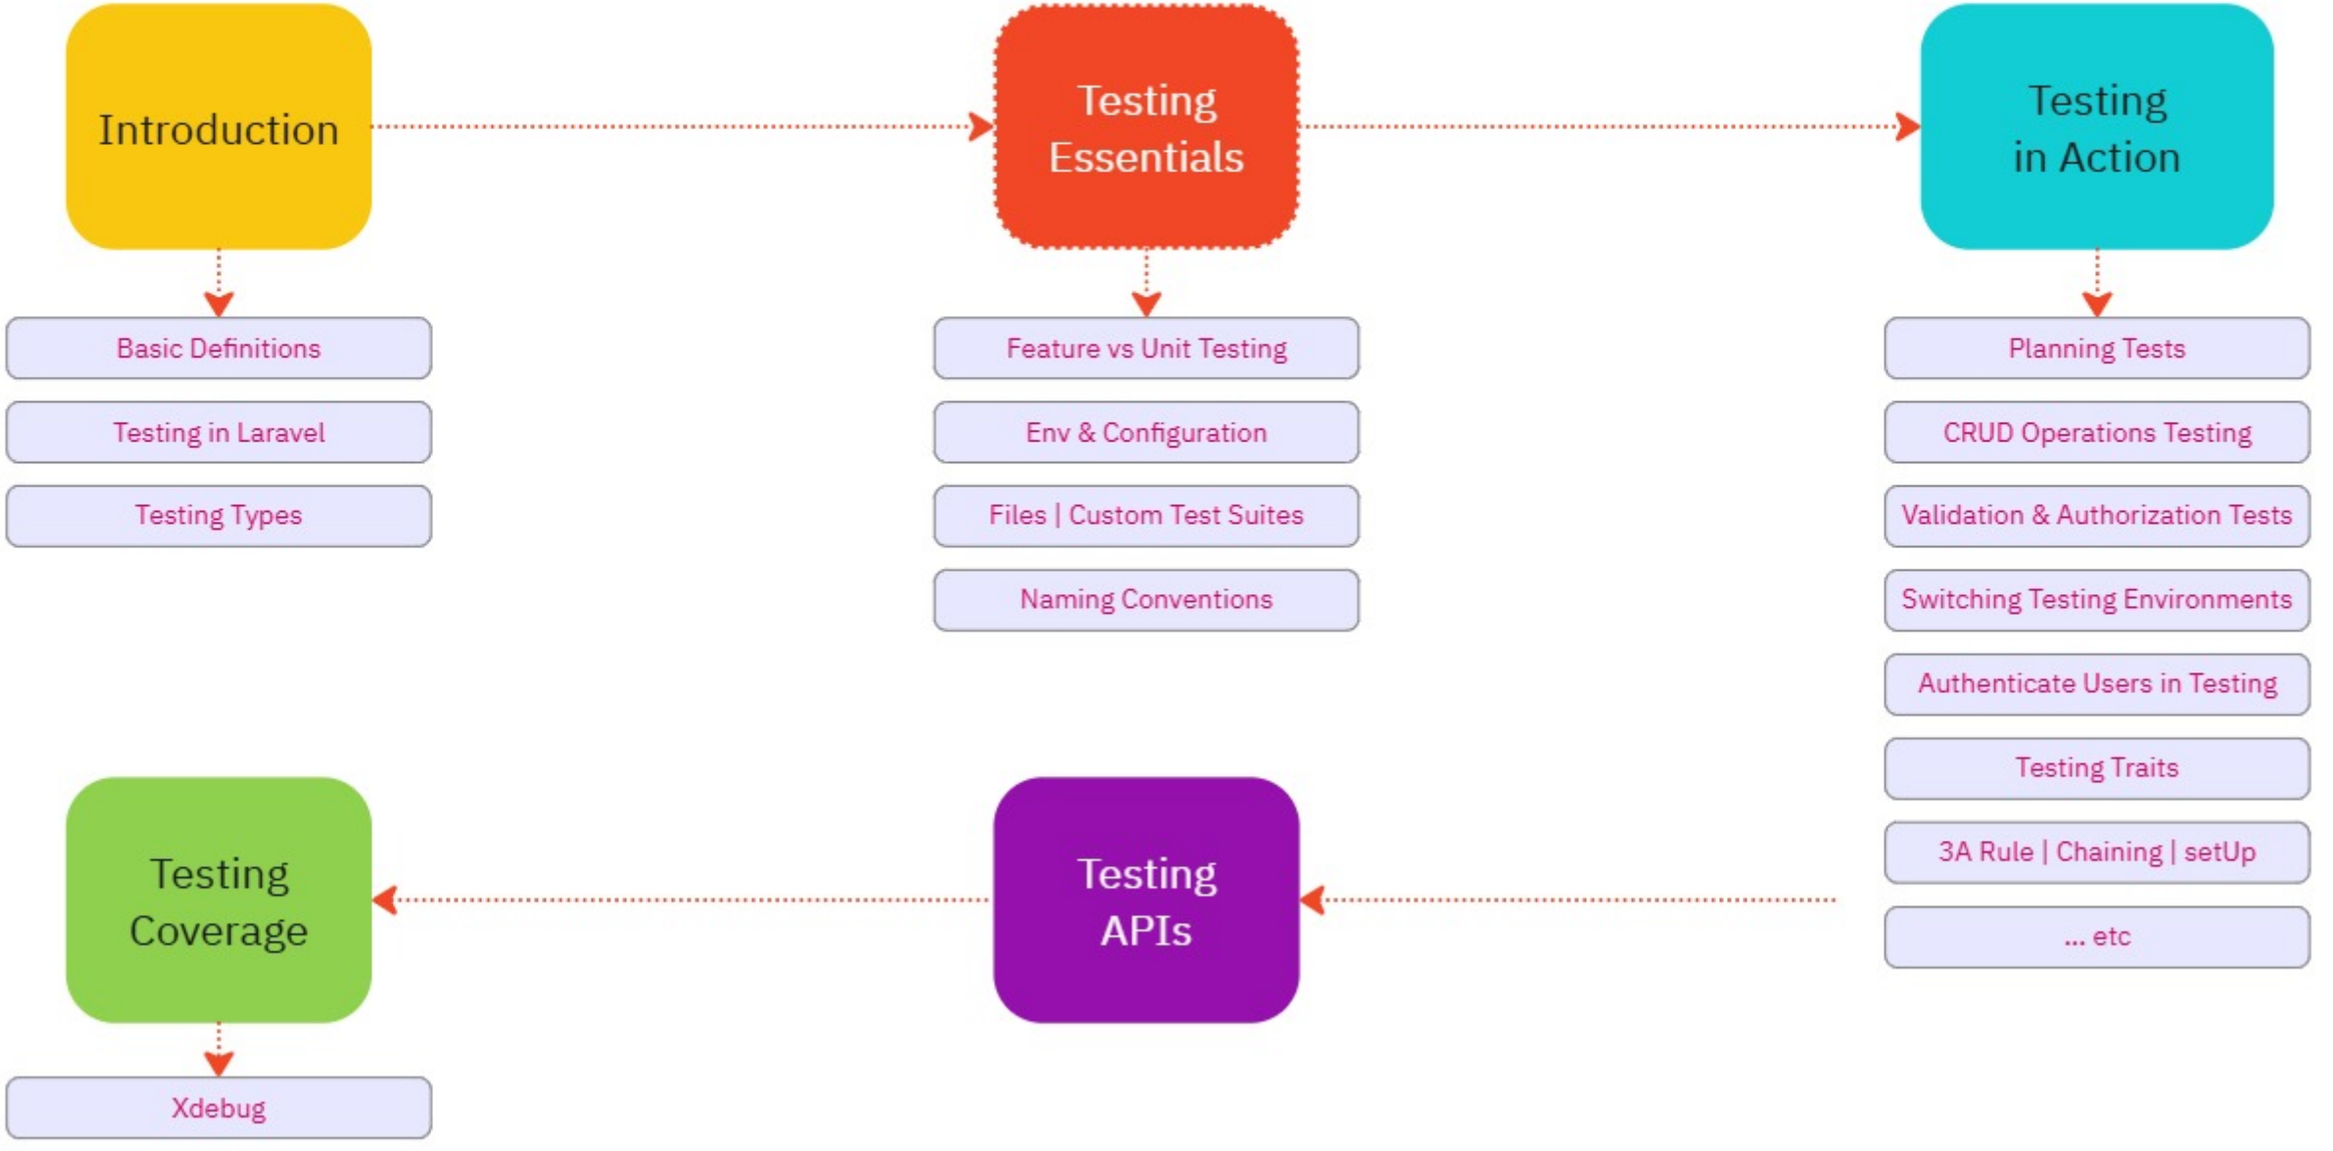
Course Structure



Naming Conventions

File Name

- Must contain Test suffix
  - ✗ Product.php
  - ✓ ProductTest.php

Function Name

- Descriptive
  - ✗ test_test1()
  - ✓ test_check_if_homepage_works_fine()
- Must contain test preffix
  - ✗ check_if_page_works()
  - ✓ test_check_if_page_works()
- Naming convention
  - snake_case ✓ test_check_if_page_works()
  - camelCase ✓ testCheckIfPageWorks()
  - pascalCase ✗ TestCheckIfPageWorks()
  - kebab-case ✗ test-check-if-page-works()

3A Rule in Testing

Arrange | Act | Assert

Arrange

```
public function test_check_if_categories_page_contains_all_categories()
{
    Category::factory()->count(5)->create();
    $user = User::factory()->create();
```

New Line

Act

```
    $response = $this->actingAs($user)->get('/categories');
```

New Line

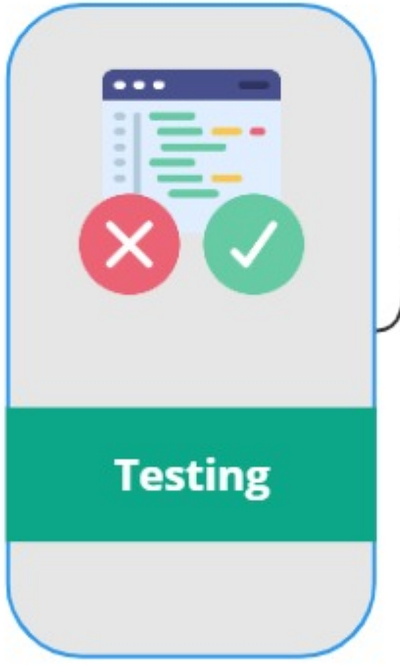
Assert

```
    $response->assertViewHas('categories', function ($categories) {
        return $categories->count() === 5;
    })
}
```

Test Coverage

percentage measure of the degree to which the source code of a program is executed when a particular test suite is run

All Project Logic



Testing functions

Xdebug & PCOV & Paratest
